

Our stylish Aerofoil Panel Base combined with almost any type or thickness of graphic panel creates a stunning visual statement.

Features & Benefits

- Silver aluminium profiles are robust and stable, with non slip rubber edging strips against the floor
- Sleek curved anodised aluminium finish looks elegant anywhere
- Various width profiles may be left open at each end or closed off with optional black end caps
- The Aerofoil can be used in pairs to support wider panels
- Black version is also available

Optional end caps

- Our Aerofoil Panel Bases look attractive when the ends of the aluminium profiles are left open. However they can look even more refined when the profiles are closed off with end caps.
- Black plastic end caps are supplied as a set of four pieces - enough for a single Aerofoil Panel Base. They are inserted as a simple push fit.

Hardware Specifications	Graphic Specifications	Additional Information
<p>Available Widths: 235, 300, 400 and 500mm wide Depending on substrate thickness each Aerofoil Panel Base is approximately 400mm deep.</p> <p>Height: Our Aerofoil Panel Bases add about 140mm to the height of the display panel.
